Quick Installation Guide

- ☑ DAG2500-48S
- ☑ DAG2500-72S
- ☑ DAG2500-96S
- ☑ DAG3000-32S
- ☑ DAG3000-312S

1 Product Model & Number of Ports

| Models / Port Type	Network Port	RJ21	RJ45
DAG2500-48S	3	2	12
DAG2500-72S	3	3	18
DAG2500-96S	3	4	24
DAG3000-32S	2	0	8
DAG3000-312S	3	13	/

- For the DAG series product, FXS Ports support two types, RJ21 or RJ45. Please check the table above for the number of ports on specific product models;

- Please confirm your product model before installation and follow the installation guideline for the model.

2 Description of Indicators

| Indicator	Definition	Status	Description
PWR	Power Indicator	On	The gateway is powered on
		Off	The gateway is powered off or there is no power supply
RUN	Running Indicator	Slow Flashing	The gateway is running properly
		Fast Flashing	SIP account is registered successfully
		Off	The gateway is running improperly
FXS	Telephone In-use Indicator	On	FXS port is currently occupied by a call
		Off	FXS port is idle or faulty
MGMT	Network Link Indicator	Green Flashing	The gateway is properly connected to network
		Off	The gateway is not connected to network or network connection is improper way
	Network Speed Indicator	On	Work at 100Mbps
		Off	Work at 10Mbps
GE0/ GE1	Network Link Indicator	Green Flashing	The gateway is properly connected to network
		Off	The gateway is not connected to network or network connection is improper way
	Network Speed Indicator	On	Work at 1000Mbps
		Off	Work at 10Mbps

4 Installation Attentions

◆ When installing the device, please confirm the type of telephone interface of the device: The telephone interface type for the DAG2500 and DAG3000 is RJ21 or Rj45;

  * Please go to **RJ45 & RJ21** Wire Sequence of this guideline to get more information about wire sequence.

◆ Anti-jamming: to reduce the interference with telephone calls, it's highly recommended that telephone lines connected to the gateway should be placed away from power cables.

◆ Power supply: Power supply: the power adapter of the gateway accepts 100-240V AC power supply. Please ensure safe and stable power supply.

◆ Network bandwidth: please ensure there is enough network bandwidth so as to guarantee stabilized running of the gateway.

◆ Temperature and humidity: to avoid any accident that might cause malfunction, it's advised to install the gateway in an equipment room where temperature and humidity are appropriate.

◆ Ventilation : to avoid overheating, please do not pile up the gateway with other devices and make sure the gateway has good ventilation around.

◆ Mechanical load: please make sure the gateway is placed steadily to avoid damage. It's highly advised to horizontally place the gateway on a flat surface or a cabinet.
5 Installation Instructions

► Connection Diagram for DAG2500-48S/72S/96S

● Connect gateway with network via a switch
● Connect FXS ports with analog phones, connect gateway with power input and grounding lug

6 RJ45 & RJ21 Wire Sequence

· RJ45 Wire Sequence

DAG2500 series products and DAG3000-32S support RJ45 Interfaces for FXS connections. One RJ45 cable can be split into four pairs of RJ11 interfaces. The outlook wire sequence of RJ45 cable is shown as follows:

Pair 1	Orange & White
	Orange
Pair 2	Green & White
	Green
Pair 3	Blue& White
	Blue
Pair 4	Brown & White
	Brown

· RJ21 Wire Sequence

DAG2500 and DAG3000 support RJ21 Interfaces for FXS connections. One RJ21 cable has 25 pairs of wires, but the 25 pair of wires never used. It means that RJ21 interface only support 24 pairs of RJ11 interfaces.

7 Modify PC's IP Address

To log in the Web Management System of the gateway, firstly, you need to modify the IP address of PC which is used to access the gateway and to make it at the same network segment with the gateway.
❶ On the PC, click '**Network (or Ethernet) → Properties**'.
❷ Double-click '**Internet Protocol Version 4 (TCP/IPv4)**'.
❸ Select '**Use the following IP address**', and then enter an available IP address '192.168.11.XXX' which is at the same network segment with '192.168.11.1'.

8 Log in Web Management System

Enter the gateway's IP address in the browser (The default IP is 192.168.11.1).
Enter the administrator's username and password to access the Web GUI. (By default the admin password is admin)

9 Modify Gateway's IP Address

If you want to modify the IP address of the gateway, please click '**Network → Local Network**' in the navigation tree on the left of the Web Management System, and then input new IP address and DNS server address on the displayed interface.

10 Configure Gateway

(1) Configure SIP Server

Log in the Web Management System of the gateway, and then click **SIP Server** in the navigation tree and then enter the address of the SIP server which is to be registered. Click **Save** in the last.

(2) Configure SIP Account Information

Click **Port** in the navigation tree on the left, and then click **Add**. Input the SIP account and authentication password assigned by the SIP server.

Click **Save** and then restart the gateway for the new configurations to take effect.

11 Basic Operations

- ◆ Dial *158# to query the IP address of LAN port of the gateway;
- ◆ Dial *159# to query the IP address of WAN port of the gateway;
- ◆ Dial *114# to query the telephone number of a FXS port;
- ◆ Dial *165*000000# to restore default IP address, username and password;
- ◆ Restore factory default settings:
    - (1) dial *166*000000#;
    - (2) press the **RST** button for 7 seconds;then restart by manual;
    - (3) Log in the gateway and then click '**Tools → Factory Reset**' , then click **Apply** and restart the gateway.
- ◆ Restart the gateway:
    - (1) Dial *111# to restart the gateway.
    - (2) Log in Web Management System, click '**Tools → Restart**' in the navigation tree on the left, and then click **Restart** on the displayed interface.

12 More Details

This document only provides instructions for quick installation and basic configuration, For detailed configuration and parameter explanation, please refer to user manual or ask for online technical support.
